Excellent interpersonal and organizational skills; able to set priorities to meet deadline while maintaining the highest quality output. Thrives in challenging environments by utilizing communication, planning and team collaboration skills.

EXPERIENCE

Projects, 2017

Brick Pro

- A full-stack web application which allows users to search for Legos by name or set id, save favorite sets, and find sellers of the items. Developed with HTML, CSS, JavaScript, Express, MongoDB and Node.js. Express, a minimalist web framework for Node.js is used to create an HTTP server to serve assets, interact with a database using CRUD programming techniques, and fetch data from Rebrickable.com API's.

Home Decor

- The HomeDecor is a full-stack app created with HTML, CSS, Javascript, React, Redux, Express, MongoDB and Node.js. Data is retrieved using Amazon AWS API's. The app enables users to search for home decorating items and allows saving favorites. Furthermore, users can get more information from links to Amazon.

Romantic Places

- A front-end only project developed with HTML, CSS and JavaScript. Integrates the Foursquare API and Google Maps API to retrieve romantic places of interest. The application interfaces with external site using AJAX (Asynchronous JavaScript And XML). It also provides different categories to suitable with users desire.
